

## PRINTABLE MEASURING TAPE

## (INCHES & CENTIMETERS)

This is a PDF document, which means it is designed to open with <u>Adobe Reader</u> software. When you print a PDF, an Adobe printer dialogue box will appear. In the size section, check the box that says "Actual size" and uncheck any boxes that have to do with scaling the document to fit. This will ensure that the measuring tape will be sized accurately. This file can be printed on 8½"x11" letter sized paper (American standard) or on A4 sized paper (European standard).

Cut out each strip of measuring tape at the dashed lines. Tape the segments together at matching measurements. For example, match the 7" line with the 7" line on the next piece.
